Vienna, the 19th April 2015

Hello dear people at your investment firm
Franklin Templeton Investor Services, LLC

I am contacting you concerning your email and am sending you the following base data to tell you, how much capital I need for what business area. Please contact me, if you are interested and invest capita to request further information. I have prepared a non disclosure agreement, that can be sent to you, when proceeding with the investment, and if you may agree to invest capital into my global company group, that I am building. This is a short overview of the business divisions, that I am building, and where I need capital. I am interested to arrange a meeting with the investor. A shared based investment is preferred, but a loan based investment is too possible. The investor should be a good person, that is too giving me at least 3 - 5 Mil EUR to my charity and wishdreams foundation before investing the capital. I want have on board only investors, that are not stealing everything from me, and are supporting me and the global company group, that I am building as decision maker.

This is the only way and possibility, how my company group will be successful. This is one of the most important things. A longer investment duration is preferred. I wish you a nice day and expect a good working together,

Hermann Helbok

Normally, I had 2015 at least a company group, that would have a global revenue of at least 500 Billion USD.

Document data and information to invest the capital

Description of the business area	Capital needed
<p>My global search engine. This includes too the creation of oem software solutions. An investment into my search engine should be made together with the IT and Outsourcing division. This is a direct competitor to google and bing, and the chinese search engine.</p> <p>The datacenter will cost additional 8 Mil EUR.</p>	<p>15,1 Mil EUR</p> <p>Data ceners + 10 Mil EUR</p>
<p>Create a new type of stocks markets. This includes too the marketing and sales.</p> <p>This stocks markets will soon get popular and will show the bankers and firms, how this business should be made.</p>	<p>26 Mil EUR</p>
<p>Create a Bank, that is offering banking services For companies and private persons. This will be a bank, that will show all banks, how banking should be. There will be made many improvements, and new things, that banks actually are not thinking about, and that banks are really doing in a wrong way! I know, that the bank and the stocks markets will be soon get offers from companies, that want buy it then. An assurance will be created too in a second step.</p>	<p>30 Mil EUR to build the infrastructure</p>
<p>Create a division, that is doing outsourcing services for companies in any business areas. This division is creating too IT Outsourcing and is realizing projects for companies. Furthermore this division offers management services and consulting services directly for companies. This division creates and sells too oem software products globally and is creating resellers and seller divisions.</p>	<p>14 Mil EUR</p>
<p>Creation of an energy division, that is offering services in the Energy market. These department data will be provided only</p>	<p>10 Mil EUR</p>
